Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-6, drawn to a specific human kinase having SEQ ID NO:2, classified in class 435, subclass 194.
- II. Claims 5-6, drawn to a specific human kinase hvaing SEQ ID NO:4, classified in class 435 subclass 194.
- III. Claim 7, drawn to ~~an~~ antibodies that specifically recognize SEQ ID NO:2 , classified in class 530, subclass 387.9.
- IV. Claim 7, drawn to antibodies which specifically recognize SEQ ID NO:4, classified in class 530, subclass 387.9.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-IV are patentably distinct each from the other because each invention is directed to a product of unrelated chemical structure and function.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1652

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
